CONTENTS FOR
HEAT TRANSFER-Japanese Research
Volume 18, Nos. 1-6, 1989

Number 1

1 Drop and Filmwise Condensation on Horizontally Scratched Rough Surfaces
Masaaki Izumi, Yoshiharu Isobe, and Shigemori Ohtani

15 Experimental Study on Natural Convective Heat Transfer from a Vertical Wavy Surface Heated at Convex/Concave Elements
Koki Kishinami, Hakaru Saito, and Ikuo Tokura

32 Natural Convection Heat Transfer in the Separation Region of a Backward-Facing Step
Toshiyuki Misumi and Kenzo Kitamura

45 Temperature Measurements of Atmospheric Argon Plasma Free Jets Using Moire-Schlieren and Spectroscopic Methods
Katsuine Tabei, Hiroyuki Shirai, Fumio Takakusagi, and Shinro Oikawa

57 An Experimental Study of Freezing Behavior in a 90° Curved Pipe (Part II)
Hideo Inaba, Shigeyoshi Oiwake, and Takeyuki Fukuda

70 Pressure Drops in Subcooled Flow Boiling in Narrow Tubes
Fujio Inasaka, Hideki Nariai, and Toshiya Shimura

83 Solidification Blockage of Laminar Flow in 90-Degree Bend (with Reference to Dimensionless Representation of Curved Pipe Flow)
Kikuji Chida and Mamoru Tajima

93 Solar Radiation Spectral Reflectances of Environmental Surfaces
Atsumasa Yoshida, Seiichi Idei, Kazuhide Tominaga, and Takeshi Kunitomo

CONTENTS FOR
HEAT TRANSFER-Japanese Research
Volume 18, Nos. 1-6, 1989

Number 1

1 Drop and Filmwise Condensation on Horizontally Scratched Rough Surfaces
Masaaki Izumi, Yoshiharu Isobe, and Shigemori Ohtani

15 Experimental Study on Natural Convective Heat Transfer from a Vertical Wavy Surface Heated at Convex/Concave Elements
Koki Kishinami, Hakaru Saito, and Ikuo Tokura

32 Natural Convection Heat Transfer in the Separation Region of a Backward-Facing Step
Toshiyuki Misumi and Kenzo Kitamura

45 Temperature Measurements of Atmospheric Argon Plasma Free Jets Using Moire-Schlieren and Spectroscopic Methods
Katsuine Tabei, Hiroyuki Shirai, Fumio Takakusagi, and Shinro Oikawa

57 An Experimental Study of Freezing Behavior in a 90° Curved Pipe (Part II)
Hideo Inaba, Shigeyoshi Oiwake, and Takeyuki Fukuda

70 Pressure Drops in Subcooled Flow Boiling in Narrow Tubes
Fujio Inasaka, Hideki Nariai, and Toshiya Shimura

83 Solidification Blockage of Laminar Flow in 90-Degree Bend (with Reference to Dimensionless Representation of Curved Pipe Flow)
Kikuji Chida and Mamoru Tajima

93 Solar Radiation Spectral Reflectances of Environmental Surfaces
Atsumasa Yoshida, Seiichi Idei, Kazuhide Tominaga, and Takeshi Kunitomo

Number 2

1 Drying and Agglomeration of Skim Milk Power by a Vibro-Fluidized Bed
Jiro Koga, Shun-ichi Kudo, Toshitaka Kobayashi and Ichiro Inoue

9 Enhancement of Forced Convective Heat Transfer in a Rectangular Channel Using Thin Plate-Type Obstacles (Part 1, Basic Characteristics of Heat Transfer and Pressure Drop with Single Phase Flow)
Koji Shiina, Shozo Nakamura and Nobuo Shimizu

28 "Full-Coverage Film Cooling on Curved Walls, Part 3, Cooling Effectiveness on Concave and Convex Walls"
Nobuhide Kasagi, Masaru Hirata, Masataka Ikeyama, Masaki Makino and Masaya Kumada

43 Flow Instabilities in a Natural Circulation Boiling Channel (Part 5, Simple Method for Judging Flow Stability)
Masaharu Furutera

54 Effect of Thermal and Optical Properties of Transparent Plates on the Collection Characteristics of "Volume Heat Trap" Solar Collectors
Yoshiyuki Bando, Makoto Nishimura, Michio Kuraishi, Makoto Masuda and Hiroshi Tajima

68 Direct Solar Thermal Energy Storage Using a Semitransparent Phase Change Material
Makoto Nishimura, Yoshiyuki Bando, Michio Kuraishi and Erich W.P. Hahne

81 Transient Heat Transfer Characteristics of a Heat Pipe
Masashi Kuramae and Siro Kashiwa

88 Collection Characteristics of a "Volume Heat Trap" Type Multipass Solar Collector-Effect of Flow Mode and Partitioning Plate
Yoshiyuki Bando, Makoto Nishimura, Michio Kuraishi and Makoto Masuda

Number 3

1 Radiant Transport Function for Radiant Heat Transfer Problems in Buildings and Urban Spaces
Yasuto Nakamura

18 Characteristics of Pool Boiling Heat Transfer in the Vicinity of the Critical Heat Flux (Relations between Bubble Motion and Heat Flux Fluctuations)
Yoshihiko Haramura

32 Fluid Flow and Heat Transfer in Wavy Sinusoidal Channels (Part II, Pressure Drop and Flow Pattern of Turbulent Flow Field)
M.R. Motamed Ektesabi, Mitsuo Sako and Tokuo Chiba

44 A Model for the Heat Transfer Limit of a Screen Wick Heat Pipe
Hidehiko Noda, Keisuke Yoshioka and Toshiro Hamatake

58 Water Vapor Evaporation into Laminar Film Flow of a Lithium Bromide-Water Solution (Influence of Variable Properties and Inlet Film Thickness on Absorption Mass Transfer Rate)
Nobuji Kawae, Tohru Shigechi, Kuniyasu Kanemaru and Takashi Yamada

71 Estimation of the Performance of a Solar-Heat Pump System
Kimio Kanayama, Hiromu Baba and Masaki Yamamoto

85 Effect of Biot Number on the Critical Condition for Spontaneous Ignition
Hua Liang and Tatsuo Tanaka

91 A Study of the Time and Spatial Micro-Structure of Heat Transfer Performance Near the Separation Point Upstream of a Forward Facing Step
Yasuo Mori, Hiroyoshi Koizumi and Yuuichiro Nogo

Number 4

1 Application of Corona Wind to Practical Tubular Heat Exchangers
Masafumi Kuriyama, Eiji Harada, and Hirotake Konno

9 Transient Natural Convection Heat Transfer in a Spherical Cavity
Yoshihiro Mochimaru

20 Local Moisture Content and Stress Distribution within Clay during Drying Shrinkage
Ikuro Shishido, Toshimitu Muramatsu, and Shigemori Ohtani

35 Particle Heating by a Thermal Argon Plasma Flow in a Tube
Dong-Wha Park, Takuya Honda, and Atushi Kanzawa

52 Experimental Investigations of the Effect of Tube Bundles on Boiling Heat Transfer
Sunao Kawai, Naoki Kawamura, Takashi Furukawa, Toshio Kitamoto, and Tadahiro Machiyama

61 Development of Converter to Change Gas-Liquid Two-Phase Slug Flow to Bubbly Flow in a Vertical Tube
Tadashi Sakaguchi, Hideaki Shakutsui, Hachiro Hamaguchi, Mamoru Ono, Hisato Minagawa, and Hidehiko Mizuta

70 Heat Transfer from the Inner Surface of a Sphere by Free Convection
Yasuaki Shiina

87 Radiative Heat Transfer Analysis in Emitting-Absorbing-Scattering Media by the Monte Carlo Method (Anisotropic Scattering Effects)
Kazuhiko Kudo, Hiroshi Taniguchi, and Takeru Fukuchi

Number 5

1 Analysis and Evaluation of Air Temperature Distribution During Heating in an Air-Conditioned Space
Hisahiro Ito, Nobuo Nakahara and Mutsumi Yokoi

27 Control of Temperature Distribution in a Supercritical Gas Extraction Tower
Masatoshi Yoshida, Shigeru Matsumoto, Goushi Honda, Tsutomu Iwama, Yasuo Suzuki, and Shouji Odagiri

43 Study on Accurate Prediction of Mist Cooling Characteristics (Part I, Effects of Surface Roughness)
Hidetoshi Ohkubo and Shigefumi Nishio

51 Annular Flow Transition Model in Channels of Various Shapes
Masahiro Osakabe, Kanji Tasaka and Yuuji Kawasaki

64 Study on Thermal Radiation Characteristics of Real Surfaces of Metals (Interference and Diffraction of Radiation at a Three-Dimensional Nonparallel Film Element)
Toshiro Makino, Tetsuya Niwa and Tomohiko Kasai

79 Heat and Mass Transfer Performance on Plate Fin and Tube Heat Exchangers with Dehumidification
Yu Seshimo, Kazuhiko Ogawa, Kenji Marumoto and Masao Fujii

Number 6

1 Heat Transfer Augmentation of an Axisymmetric Impinging Jet Using a Perforated Plate Set in Front of a Target Plate (Part 1. The Effects of Diameter and Hole Pitch in the Perforated Plate)
Junji Kurima and Masahide Miyamoto

21 Critical Heat Flux in Narrow Tubes with Uniform Heating
Hideki Nariai, Fujio Inasaka and Kazunori Uehara

31 Condensation of Downward Flowing R-113 Vapor on Bundles of Horizontal Smooth Tubes
Hiroshi Honda, Bunken Uchima, Shigeru Nozu, Hironori Nakata, and Tetsu Fujii

53 Forced Air Heat Sink with New Enhanced Fins
Masao Fujii, Yu Seshimo, Shigeki Ueno and Goro Yamanaka

66 Film Boiling Heat Transfer from a Finite-Size Horizontal Plate Facing Downward
Tohru Shigechi, Nobuji Kawae, Kuniyasu Kanemaru and Takashi Yamada

79 Heat Transfer with a Solid-Liquid Suspension Flowing Through a Horizontal Rectangular Duct
Eiji Harada, Masafumi Kuriyama and Hirotaka Konno

95 Flow Patterns and Heat Transfer Mechanism of Circular Closed Thermosyphons
Hideaki Yamagishi, Ryoji Ishiguro, Toshiaki Kumada, Yoichi Maruko, and Hiromu Sugiyama
